To ensure you have the latest revision of the manual or to obtain the illustrated parts catalog, please visit the Bunn-O-Matic website, at www.bunn.com. This is absolutely FREE, and the quickest way to obtain the latest catalog and manual updates. Contact Bunn-O-Matic Corporation at 1-800-286-6070 to obtain a paper copy of the required Illustrated Parts Catalog mailed via U.S. Postal Service.
BUNN-O-MATIC COMMERCIAL PRODUCT WARRANTY
Bunn-O-Matic Corp. (“BUNN”) warrants equipment manufactured by it as follows:

1) Airpots, thermal carafes, decanters, GPR servers, iced tea/coffee dispensers, MCR/MCP/MCA single cup brewers, thermal servers and ThermoFresh® servers (mechanical and digital) 1 year parts and 1 year labor.
2) All other equipment - 2 years parts and 1 year labor plus added warranties as specified below:
   a) Electronic circuit and/or control boards - parts and labor for 3 years.
   b) Compressors on refrigeration equipment - 5 years parts and 1 year labor.
   c) Grinding burrs on coffee grinding equipment to grind coffee to meet original factory screen sieve analysis - parts and labor for 4 years or 40,000 pounds of coffee, whichever comes first.

These warranty periods run from the date of installation BUNN warrants that the equipment manufactured by it will be commercially free of defects in material and workmanship existing at the time of manufacture and appearing within the applicable warranty period. This warranty does not apply to any equipment, component or part that was not manufactured by BUNN or that, in BUNN’s judgment, has been affected by misuse, neglect, alteration, improper installation or operation, improper maintenance or repair, non periodic cleaning and descaling, equipment failures related to poor water quality, damage or casualty. In addition, the warranty does not apply to replacement of items subject to normal use including but not limited to user replaceable parts such as seals and gaskets. This warranty is conditioned on the Buyer 1) giving BUNN prompt notice of any claim to be made under this warranty by telephone at (217) 529-6601 or by writing to Post Office Box 3227, Springfield, Illinois 62708-3227; 2) if requested by BUNN, shipping the defective equipment prepaid to an authorized BUNN service location; and 3) receiving prior authorization from BUNN that the defective equipment is under warranty.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY OTHER WARRANTY, WRITTEN OR ORAL, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF EITHER MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. The agents, dealers or employees of BUNN are not authorized to make modifications to this warranty or to make additional warranties that are binding on BUNN. Accordingly, statements by such individuals, whether oral or written, do not constitute warranties and should not be relied upon.

If BUNN determines in its sole discretion that the equipment does not conform to the warranty, BUNN, at its exclusive option while the equipment is under warranty, shall either 1) provide at no charge replacement parts and/or labor (during the applicable parts and labor warranty periods specified above) to repair the defective components, provided that this repair is done by a BUNN Authorized Service Representative; or 2) shall replace the equipment or refund the purchase price for the equipment.

THE BUYER’S REMEDY AGAINST BUNN FOR THE BREACH OF ANY OBLIGATION ARISING OUT OF THE SALE OF THIS EQUIPMENT, WHETHER DERIVED FROM WARRANTY OR OTHERWISE, SHALL BE LIMITED, AT BUNN’S SOLE OPTION AS SPECIFIED HEREIN, TO REPAIR, REPLACEMENT OR REFUND.

In no event shall BUNN be liable for any other damage or loss, including, but not limited to, lost profits, lost sales, loss of use of equipment, claims of Buyer’s customers, cost of capital, cost of down time, cost of substitute equipment, facilities or services, or any other special, incidental or consequential damages.

INTRODUCTION

This equipment heats and dispenses water on demand for beverages and cooking purposes. It has a panel above the faucet that indicates the status of the dispenser. This equipment is for indoor use, either wall-mounted (H5E/X/PC) or on a sturdy counter or shelf.

Brew water temperature is factory set at 200°F (93.3°C). Areas of high altitude will require lowering this temperature to prevent boiling. This chart should be used as a guide when readjusting the brew water temperature.

CE REQUIREMENTS

- This appliance must be installed in locations where it can be overseen by trained personnel.
- For proper operation, this appliance must be installed where the temperature is between 5°C to 35°C.
- Appliance shall not be tilted more than 10° for safe operation.
- An electrician must provide electrical service as specified in conformance with all local and national codes.
- This appliance must not be cleaned by water jet.
- This appliance can be used by persons aged from 18 years and above if they have been given supervision or instruction concerning use of the appliance in a safe way and if they understand the hazards involved.
- Keep the appliance and its cord out of reach of children aged less than 18 years.
- Appliances can be used by persons 18 years and above with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children under the age of 18 years should be supervised to ensure they do not play with the appliance.
- If the power cord is ever damaged, it must be replaced by the manufacturer or authorized service personnel with a special cord available from the manufacturer or its authorized service personnel in order to avoid a hazard.
- Machine must not be immersed for cleaning.
- Cleaning and user maintenance shall not be made by children unless they are older than 18 years and supervised.
- This appliance is intended to be used in household and similar applications such as:
  - staff kitchen areas in shops, offices and other working environments;
  - by clients in hotels, motels and other residential type environments;
  - bed and breakfast type environments.
- This appliance not intended to be used in applications such as:
  - farm houses;
- Access to the service areas permitted by Authorized Service personnel only.
- The A-Weighted sound pressure level is below 70 dBA.

NORTH AMERICAN REQUIREMENTS

- This appliance must be installed in locations where it can be overseen by trained personnel.
- For proper operation, this appliance must be installed where the temperature is between 41°F to 95°F (5°C to 35°C).
- Appliance shall not be tilted more than 10° for safe operation.
- An electrician must provide electrical service as specified in conformance with all local and national codes.
- This appliance must not be cleaned by pressure washer.
- This appliance can be used by persons aged from 18 years and above if they have been given supervision or instruction concerning use of the appliance in a safe way and if they understand the hazards involved.
- Keep the appliance and its cord out of reach of children aged less than 18 years.
- Appliances can be used by persons 18 years and above with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children under the age of 18 years should be supervised to ensure they do not play with the appliance.
- If the power cord is ever damaged, it must be replaced by the manufacturer or authorized service personnel with a special cord available from the manufacturer or its authorized service personnel in order to avoid a hazard.
- Machine must not be immersed for cleaning.
- Cleaning and user maintenance shall not be made by children unless they are older than 18 years and supervised.
- This appliance is intended for commercial use in applications such as:
  - staff kitchen areas in shops, offices and other working environments;
  - by clients in hotel and motel lobbies and other similar types of environments;
- Access to the service areas permitted by Authorized Service personnel only.
USER NOTICES

The notices on this dispenser should be kept in good condition. Replace unreadable or damaged labels.

NOTICE
ALL COMPONENTS ARE 200 TO 240 VOLT A.C.
Replace only with components listed in the accompanying literature rated for the same voltage

Electrical Hook-Up

**CAUTION** – Improper electrical installation will damage electronic components.

1. An electrician must provide electrical service as specified.
2. Using a voltmeter, check the voltage and color coding of each conductor at the electrical source.
3. Turn off master switch (if equipped).
4. Remove the upper and lower rear panels.
5. Install the proper electrical wiring to the terminal block.
6. Connect the dispenser to the power source and verify the voltage at the terminal block before proceeding. Reinstall both rear panels.
7. If plumbing is to be hooked-up later be sure the dispenser is disconnected from the power source. If Plumbing has been hooked-up, the dispenser is ready for Initial Set-Up.
INITIAL SET-UP - H5E, H5X, H5-PC, H10X, H3/5 Element

CAUTION - The dispenser must be disconnected from the power source throughout the initial set-up, except when specified in the instructions.

1. Connect dispenser to the power source and turn on water supply.
2. Place Master ON/OFF switch in the ON position (if equipped). NOTE: (Digital models with display) When power is applied to the dispenser, the display will show the software version for 5 seconds, and then it will show the temperature.
3. Water will automatically flow into the tank to the proper level and shut-off. When filled, the water heater will turn on automatically.
4. The tank will heat to the (set) temperature.
5. Refer to Programming to set the Tank Temperature and the Ready Temperature.

NOTE: On H3 Element only, a small amount of expansion water on back of drip tray is normal during initial and/or back to back heating cycles.
INITIAL SET-UP - H5M

CAUTION - The dispenser must be disconnected from the power source throughout the initial set-up, except when specified in the instructions.
1. Remove the upper rear panel and rotate the control thermostat knob fully counterclockwise to the “OFF” position and replace the panel.
2. Connect the dispenser to the power source and turn-on the water supply.
3. Water will automatically flow into the tank to the proper level and shut-off. This will take approximately 10 minutes.
4. Disconnect the dispenser from the power source, remove the upper rear panel and place the control thermostat knob fully clockwise to the “ON” position, and replace the panel.
5. Connect the dispenser to the power source and wait approximately twenty minutes for the water in the tank to heat.
6. On models with ready indicator, the indicator will light up when the proper water temperature is achieved.

INITIAL SET-UP - HW2

CAUTION - The dispenser must be disconnected from the power source throughout the initial set-up, except when specified in the instructions.
1. Remove the center rear panel and rotate the control thermostat knob fully counterclockwise to the “OFF” position and replace the panel.
2. Plug-in the dispenser.
3. Water will automatically flow into the tank to the proper level and shut-off.
4. Unplug the dispenser, remove the center rear panel and rotate the control thermostat knob fully clockwise to the “ON” position, and replace the panel.
5. Plug-in the dispenser and wait approximately twenty minutes for the water in the tank to heat. The dispenser is ready for use.

INITIAL SET-UP - OHW

CAUTION - The dispenser must be unplugged throughout the initial set-up, except when specified in the instructions.
1. Place an empty vessel under the faucet, lift the pour-in lid, and pour a full pitcher (64 oz) of tap water into the top of the dispenser. Hold open the faucet handle to allow air to escape from the tank while it is filling.
2. Pour another full pitcher into the top. Close the faucet when water starts flowing from the faucet.
3. Fill the top basin with additional water until it is approximately one inch from the top lid.
4. Plug-in the dispenser and wait approximately 15 minutes for the water to heat to the proper temperature.
5. The dispenser is now ready for use. (refer to the section on normal use.)

NORMAL USE

CAUTION - Water dispensed from this faucet is extremely hot. (Above 200° F.)
1. Hold open the faucet whenever a cup of hot water is desired.
2. Pour another full pitcher into the top whenever water is no longer available at the faucet. No wait is needed, the faucet is ready to dispense another cup of hot water.

NOTE - Due to the tank capacity and heater size, this product should be used only for dispensing a few cups of hot water at a time. (Larger capacity Bunn-O-Matic hot water dispensers are available.)
OPERATING CONTROLS - H5 PORTION CONTROL ONLY

(a) VOLUME SELECTOR BUTTONS
Press and release the button corresponding to the Small, Medium, or Large volume, to select the desired amount of water to be dispensed. Pressing a different button after a cycle has been initiated does not change the volume in progress.

(b) AUTO STOP/MANUAL DISPENSE BUTTON
Press and release button to stop a dispense cycle. Press and hold button to dispense manually.

(c) HIDDEN PROGRAMMING BUTTON
(d) LED INDICATORS
(e) DISPENSE NOZZLE

ADJUSTING DISPENSE VOLUMES

NOTE: The dispenser should be at operating temperature before setting dispense volumes.

1. Press and hold the hidden programming button (c) located under the ® next to the BUNN logo on the front of the dispenser until the 3 LED’s begin flashing from the left to the right. Release the button.
2. Place an empty graduated container under the dispense nozzle (e).
3. Press and release the batch size to be set (a). The LED’s will stop flashing, and the LED over the button just pressed will come on steady. Water will begin to dispense into the container.
4. When the desired amount of water is dispensed, press and release the same button (a). The water will stop dispensing and the batch size is now set.
5. The LED’s will begin flashing from left to right again. Repeat steps 2 thru 4 to set up the other batch sizes.
6. To exit the programming set up at any time, press and release the hidden button once (c). The dispenser is now ready for use.
PROGRAMMING - H5-E, H5-PC, H5X, H10X

When power is applied to the dispenser, the display located on the bottom of the main circuit board will show the software version for 5 seconds, and then it will show the model number (see chart below) it will then go to (-). While the tank is filling, the display will read (FIL). When the tank is full the display will show the model number and then go to (-).

MODEL DISPLAYS (P1)

(H5H) 5 Gallon High Voltage Unit (200-240V)
(H5L) 5 Gallon Low Voltage Unit (100-120V)
(HPC) 5 Gallon Portion Control Unit (all)
(H10) 10X (all)

LEVEL 1 PROGRAMMING

1. Before programming any settings into the Control Board, confirm the correct model number is entered.
2. Do this by pressing and holding down on the center button until P1 appears on the display. Release the center button. The display will now show the model number (ex: H5H). Now scroll with the (+/-) buttons through the models listed above until the display matches the model you are working with.
3. Press and release the center button once more. The display will show P2. Display will now show the tank temperature (ex: 200). Press the (+) button to increase the temperature set point, or the (-) button to decrease the set point.
4. After the Tank Temperature is entered, press and release the center button once more. The display will read P3, then show the ready temperature set point. Factory default is 195° F for most dispensers, and 85° F for some.
5. Press the (+) button to increase the set point, or the (-) button to decrease the set point.
6. To exit Level 1 Program press and release the center button once more. The display will show Software version, then model number, then (-).

NOTE: If the unit is a H5X or H10X, set the Tank Temperature to 212°F.

Continued
PROGRAMMING - H5-E, H5-PC, H5X, H10X Continued

LEVEL 2 PROGRAMMING

H1 - DISPENSE TEMPERATURE LOCKOUT - PORTION CONTROL ONLY
(WILL NOT DISPLAY ON OTHER MODELS)
1. To enter Level 2 Programming, press and hold the center button until H1 appears on the display (approximately 6 seconds) then release button. The display will either read noL (LOCKOUT DISABLED) or Loc (LOCKOUT ENABLED). When (ENABLED), unit will not dispense if the Tank Temperature is below the (READY) temperature setting.
2. Use the (+) or (-) buttons to alternate between Loc and noL.
3. Press and release the center button once more to advance to H2.

Or to exit Level 2, press and release the center button 3 times. Display will show, software version, then model number, then (-).

H2 - F° OR C° SELECTION

NOTE: Skip step 1 if going from H1 to H2.
1. To enter Level 2 Programming, press and hold the center button until H2 appears on the display (approximately 6 seconds). Release the center button. The display will show either FAH (Degrees in Fahrenheit) or CEn (Degrees in Centigrade).
2. Press and release the (+) or (-) buttons to alternate between FAH and CEn.
3. After setting FAH or CEn, to exit Level 2 Programming, press and release the center button twice. Display will show, software version, then model number, then (-).

H3 - RESTORING FACTORY DEFAULTS
1. To restore Factory Defaults (This clears all settings that were previously entered), press and release the center button until H2 appears on the display (approximately 6 seconds). Release the Center Button, then press and release the Center Button once more. The display will read H3, then show (- - -).
2. Press and hold both (+) and (-) buttons to initiate the resetting of the factory default settings. The display (- - -) will flash on and off during this time (about 5 to 7 seconds).
3. When the factory default numbers are loaded in, the display will stop flashing, then read don (DONE). You can now release the two buttons.

NOTE: If you release the two buttons at any time before the display reads don, the Factory Default numbers will not be entered. The old numbers will remain in the memory.

4. To exit Level 2 Programming press and release the center button once more. The display will show the Software version, then model number, then (-).
PROGRAMMING - H5-ELEMENT

Adjusting temperature:
The switch must be in the “SET” position in order to access the program modes.
1. Press and hold “TEMP” button until display flashes.
2. While display is flashing, press and release the (+) to increase or (-) to decrease temperature.

NOTE: (Starting with software version 0.07)
If unit is “E” model, temp will stop at 211°F (99°C).
If unit is “X” model, temp display will jump from 211°F (96°C) to 212°F (100°C).

Refer to chart on page 3 and adjust temperature requirements according to altitude.

Program lockout switch:
The switch must be in the “SET” position in order to access the program modes.
1. Disconnect the dispenser from the power source.
2. Remove the 4-40 screws and the top cover.
3. Use a small screwdriver to move switch to set position.
4. Install top cover, connect dispenser to power source.

Manual Energy Saver Mode:
The energy save mode will allow the tank temperature to drop down to 140°F (60°C).
1. Simultaneously press and release the (+) and (-) to “manually” activate energy save mode.
2. The display will alternately flash between 140 and the current temperature to indicate it is in the energy save mode.
3. Repeat procedure to exit energy save mode.

Programming the dispenser:
1. Press and hold upper hidden button (bottom center of “BUNN” logo) until “P1” is displayed.

Continued
2. The display will now show the model number.
   (H5H)  5 Gallon High Voltage Unit (200-240V)
   (H5L)  5 Gallon Low Voltage Unit (100-120V)
   Now scroll with the (+/-) buttons through the models listed above until the display
   matches the model you are working with.

3. Press and release the upper hidden button once more. The display will show P2.
   Display will now show the “SET” temperature (ex: 200). Press the (+) button to
   increase the temperature set point, or the (-) button to decrease the set point.
   Range: 60°F (15°C) to 211°F (99°C) **NOTE:** Temp will go to 212°F (100°C) on H5X.

4. After the Tank Temperature is entered, press and release the upper hidden button
   once more. The display will read P3, then show the ready temperature set point.
   Range: 2° to 20° below the “SET” temperature.

5. Press the (+) button to increase, or the (-) button to decrease the set point.

6. Press and release the upper hidden button once more. The display will read P4.
   This screen will allow you to turn the “Auto” energy save mode ON/OFF.
   **NOTE:** Turning off this function will disable “P5” and “P6”.

7. Press and release the upper hidden button once more. The display will read P5.
   This will toggle the energy save mode from 140°F (60°C) or tank heater “OFF”.

8. Press and release the upper hidden button once more. The display will read P6.
   This is the time delay from the last refill to the activation of energy save mode.
   Range: 4 hours to 24 hours.
LEVEL 2 PROGRAMMING

H2 - F° OR C° SELECTION

1. To enter Level 2 Programming, press and hold the upper hidden button until H2 appears on the display. Release the upper hidden button. The display will show either FAH (Degrees in Fahrenheit) or CEn (Degrees in Centigrade).
2. Press and release the (+) or (-) buttons to alternate between FAH and CEn.
3. After setting FAH or CEn, to exit Level 2 Programming, press and release the upper hidden button twice. Display will show, software version, then main screen.

H3 - RESTORING FACTORY DEFAULTS

1. To restore Factory Defaults (This clears all settings that were previously entered), press and release the upper hidden button until H2 appears on the display (approximately 6 seconds). Release the upper hidden Button, then press and release the upper hidden Button once more. The display will read H3, then show (- - -).
2. Press and hold both (+) and (-) buttons to initiate the resetting of the factory default settings. The display (- - -) will flash on and off during this time.
3. When the factory default numbers are loaded in, the display will stop flashing, then read don (DONE). You can now release the two buttons.

NOTE: If you release the two buttons at any time before the display reads don, the Factory Default numbers will not be entered. The old numbers will remain in the memory.
**PROGRAMMING - H3E ELEMENT**

**Program lockout switch:**
The switch must be in the “SET” position in order to access the program modes.

1. Disconnect the dispenser from the power source.
2. Remove the 4-40 screws and the top cover.
3. Looking from back to front, use a small screwdriver (or similar item) through slot in front housing to move switch to set position.
4. Install top cover, connect dispenser to power source.

![Programming button](image)
1. Press and release the hidden button. The display will show P1. Display will now show the “SET” temperature. Press the (+) button to increase the temperature set point, or the (-) button to decrease the set point. Range: 15°C (60°F) to 96°C (205°F). Default: 93°C.

2. After the Tank Temperature is entered, press and release the hidden button once more. The display will read P2, then show the ready temperature set point. Range: 2°C to 10°C below the “SET” temperature. Default: 90°C.

3. Press the (+) button to increase, or the (-) button to decrease the set point.

4. Press and release the hidden button once more. The display will read P3. This screen will allow you to turn the “Auto” energy save mode ON/OFF. Default: OFF.

   **NOTE:** Turning off this function will disable “P4” and “P5”.

5. Press and release the hidden button once more. The display will read P4. This will toggle the energy save mode from 60°C (140°F) or tank heater “OFF”.

6. Press and release the upper hidden button once more. The display will read P5. This is the time delay from the last refill to the activation of energy save mode. Range: 4 hours to 24 hours.
PROGRAMMING - H3E ELEMENT Continued

LEVEL 2 PROGRAMMING

H1 - DISPENSE LOCKOUT

1. To enter Level 2 Programming, press and hold the hidden button until H1 appears on the display. Release the hidden button. The display will show “noL” (no lockout) or Loc (dispense lockout).
2. Press and release the (+) or (-) buttons to alternate between noL and Loc.

H2 - C° OR F° SELECTION

1. To enter Level 2 Programming, press and hold the hidden button until H1 appears on the display. Press and release the hidden button. The display will show CEn (Degrees in Centigrade) or FAH (Degrees in Fahrenheit)
2. Press and release the (+) or (-) buttons to alternate between FAH and CEn.

H3 - RESTORING FACTORY DEFAULTS

1. To restore Factory Defaults (This clears all settings that were previously entered), press and release the hidden button until H1 appears on the display. Press and release the hidden button, then press and release the hidden button once more. The display will read H3, then show (- - -).
2. Press and hold both (+) and (-) buttons to initiate the resetting of the factory default settings. The display (- - -) will flash on and off during this time.
3. When the factory default numbers are loaded in, the display will stop flashing, then read don (DONE). You can now release the two buttons.

NOTE: If you release the two buttons at any time before the display reads don, the Factory Default numbers will not be entered. The old numbers will remain in the memory.
PROGRAMMING - H3E/X ELEMENT Continued

For software versions 5.11 and above

**P1:** Model selection. H5H, H5L, H3 toggle through model numbers with +/-.

**P2:** Press and release the hidden button. The display will show **P2**. Display will now show the “SET” temperature. Press the (+) button to increase the temperature set point, or the (-) button to decrease the set point.

   Range: 15°C (60°F) to 96°C (205°F). Default: 93°C (200°F)

**P3:** After the Tank Temperature is entered, press and release the hidden button once more. The display will read **P3**, then show the ready temperature set point.

   Range: 2°C (2°F) to 10°C (20°F) below the “SET” temperature. Default: 5°F. Press the (+) button to increase, or the (-) button to decrease the set point.

**P4:** Press and release the hidden button once more. The display will read **P4**. This screen will allow you to turn the “Auto” energy save mode ON/OFF. Default: OFF.

   **NOTE:** Turning off this function will disable “P5” - “P6”.

**P5:** Press and release the hidden button once more. The display will read **P5**. This will toggle the energy save mode from 60°C (140°F) or tank heater “OFF”.
PROGRAMMING - H3E ELEMENT Continued

**P6:** Press and release the upper hidden button once more. The display will read P6. This is the time delay from the last refill to the activation of energy save mode. Range: 4 hours to 24 hours.

**P7:** Press and release the upper hidden button once more. The display will read P7. This sets the dispense time for “Portion Control”. Default is “0” (Push & Hold).

During exit of program mode, software version will be displayed.

**NOTE:** Refer to page 17 for H1 - H3 modes.
**DRAINING THE DISPENSER**

**- OHW**

**CAUTION** - The dispenser must be disconnected from the power source throughout these steps.

1. Disconnect the dispenser from the power source and allow dispenser to cool.
2. Tilt dispenser forward over sink.
3. Open faucet.
4. Continue tilting dispenser forward over sink until water stops flowing.

**NOTE** - The dispenser must be full using the INITIAL SET-UP steps before reconnecting to the power source.

**- ALL 2, 3 & 5 GALLON MODELS**

1. Disconnect the dispenser from the power source and allow dispenser to cool.
2. Remove upper rear access cover(s).
3. Close the white shutoff clamp on the long hose between tank and inlet solenoid.
4. Disconnect the hose clamp and hose from inlet solenoid or check valve.
5. Place the end of the drain hose in a container that has a minimum capacity of 2.0 gallons (7.5 L) HW2,
   5Gal/18.9L for H5E,M,X, & Element.
6. Release the white clamp to drain water from the tank.
7. When tank is empty, replace the hose onto solenoid (or flow control) and tighten the black clamp.
   **NOTE: Do not tighten white clamp!**
8. Replace the access cover.

**- 10 GALLON MODELS**

1. Disconnect the dispenser from the power source and allow dispenser to cool.
2. Remove left side access cover.
3. Close the white shutoff clamp on the long hose that is teed between tank and inlet solenoid.
4. Disconnect the hose clamp and plug from loose end of long hose.
5. Place the end of the drain hose in a container that has a minimum capacity of 10Gal/37.8L.
6. Release the white clamp to drain water from the tank.
7. When tank is empty, replace the clamp and plug and tighten the black clamp.
8. Replace the access cover.

**Alternate method:**

**- ALL 2, 5 & 10 GALLON MODELS**

**CAUTION** - The dispenser must be disconnected from the power source throughout these steps.

1. Disconnect the dispenser from the power source.
2. Shut-off and disconnect the incoming water supply and allow dispenser to cool.
3. Remove the 4-40 screws and the top cover.
4. Gently remove one of the grommets from the tank lid.
5. Insert a tube to the bottom of the tank and syphon **ALL** of the water out.

**CLEANING**

The use of a damp cloth rinsed in any mild, non-abrasive, liquid detergent is recommended for cleaning all
surfaces on Bunn-O-Matic equipment.

**WALL MOUNTED INSTALLATION - 5 GALLON MODELS ONLY**

If the dispenser is wall mounted, the bottom of the dispenser should be at the same height as a counter or
table top. Use B.O.M. part #12542.0000 for side mounted Wall Bracket Kit or # 13125.0001 for front mounted
Wall Bracket Kit.

**SUPPORT FOR LARGE RECEPTACLES**

**CAUTION:** If the dispenser is to be used with larger receptacles such as pitchers or pots, those receptacles must
be adequately supported during dispensing of hot water to avoid spillage of very hot water. This support may be
provided by a table or counter top, or use B.O.M. part #12599.0000 Shelf Kit.
